Build for what happens inside.

Designing for the human experience at work.

The modern workday is shaped around transitions. From focus to collaboration, from presence to hybrid interaction or from performance to recovery, the style of work is shifting constantly.

A workplace should therefore offer more than just a place for people to work. It should respond to their needs and positively shape their experience throughout the day.

That's why the most important part of workplace design isn't what you see on the outside.

It's what happens inside.

The Hushclassic line by Hushoffice is designed to belong.

With a versatile choice of colours and finishes, Hushclassic pods fit naturally into different workplace environments. They support a cohesive interior and help create spaces that feel welcoming, familiar, and connected to the way people work.

Created for the everyday demands of modern offices, Hushclassic pods combine intuitive use with solid acoustic performance. Their modular construction supports a variety of settings, from individual focus pods to meeting pods in different sizes. The result is a comfortable and private space that brings greater flexibility to the office.

Acoustics that support people

Open offices connect people. They can also overwhelm them.

Open workplaces make communication and collaboration easier, but they also expose people to a constant flow of conversations, movement and background noise. What feels lively in one moment can become distracting and mentally demanding in the next.

Concentration is part of everyday work, from reading and writing to planning, problem solving and preparing for meetings. When people have to continuously filter out what is happening around them, more mental energy goes into managing the environment and less remains for the task itself. Focus becomes harder to sustain, tasks take longer and the quality of work can suffer.

Distraction is part of everyday office life, even when concentration matters most.

90%

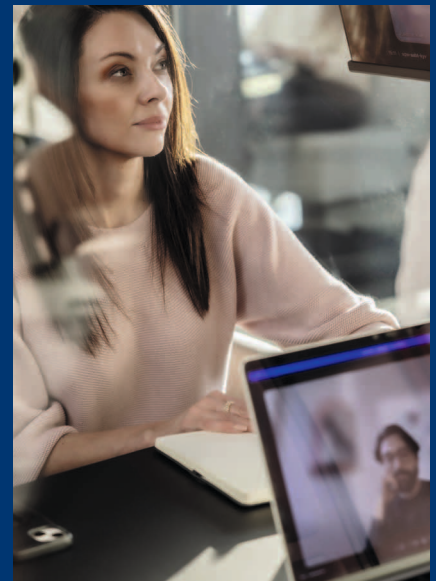

get distracted at work¹

74%

of working alone time requires high concentration¹

80%

get distracted by chatty coworker²

When workplaces support people, satisfaction, engagement and organisational outcomes can grow.

+80%

willingness to put in extra effort beyond my job description¹

+200%

Job satisfaction

+23%

Profitability among organisations with high employee engagement²

Better acoustics create more calm, focus and control.

When people can choose a space that matches what they need in the moment, the workplace feels more supportive. A quieter environment makes it easier to settle into a task, stay concentrated for longer and work with less mental effort. That sense of control can support comfort and wellbeing while creating the conditions for more considered and consistent work.

Focus is not only about working alone. Hybrid meetings are now part of everyday office life, creating a growing need for spaces where people can listen, speak and participate without competing with surrounding activity.

Hushoffice acoustic pods bring these focused settings into the open workplace exactly where they are needed. They create dedicated spaces for individual work, video calls and collaboration while keeping the wider office open, connected and flexible.

*** Figures relate to the Posadzimy.pl tree-planting initiative supported by Hushoffice and do not represent environmental impacts attributable to an individual product

Designed for long-term value

Hushclassic combines thoughtful design with carefully selected materials and manufacturing processes. Produced in the EU, it is made in a facility certified to ISO 9001 and ISO 14001 standards and uses wood-based materials sourced from PEFC-certified forests.

Recyclable packaging, solutions designed to support efficient energy use and Environmental Product Declarations (EPDs) available for selected products reflect our commitment to transparency and continuous improvement. Beyond manufacturing, Hushoffice supports local tree-planting and community initiatives through environmental programmes.

Independent certifications and testing confirm quality, safety and acoustic performance, giving architects, designers and end users confidence in every workspace application. This combination of responsible production, certified quality and durable design makes Hushclassic a reliable choice for organisations looking to create workplaces with long-term value in mind.

Hushphone, Hushhybrid and Hushmeet

Hushclassic line – acoustic pods combining design freedom and proven functionality for everyday work

The Hushclassic line includes 8 acoustic pod models that combine thoughtful design choices with practical functionality for flexible workplaces, creating comfortable spaces for focused work, calls, and confidential meetings. Certified to the ISO 23351-1:2020 standard, these pods create a professional acoustic barrier that guarantees confidentiality and effectively keeps the office noise outside.

Comfort & performance

Acoustic comfort, fresh airflow and ergonomic details support people throughout the working day.

Design freedom

Colours, textures and finishes offer the freedom to create pods that fit naturally into any interior.

Modular flexibility

Modular sizes and configurations make it easy to choose the right space for different teams and needs.

*Available for European markets and models Hushphone, Hushhybrid and Hushmeet.

Acoustic Comfort

High-performing acoustics supported by upholstered panels, quality glazing and a carefully engineered structure.

Speech & Visual Privacy

Reduces distractions and supports focused work and confidential conversations, with optional Privacy Film for added visual privacy.

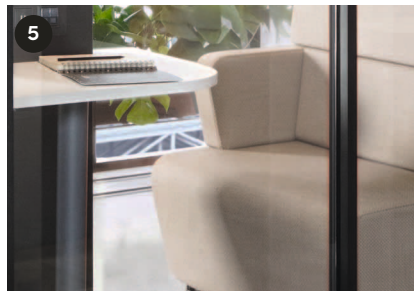

Quiet, Efficient Ventilation

Continuous fresh airflow helps maintain comfort and concentration throughout longer work sessions.

Intuitive Manual Controls

Dedicated knobs provide direct control of lighting and ventilation without apps, touchscreens or additional displays.

Integrated Ergonomic Furniture

Purpose-designed sofas and ergonomic tables create a comfortable, functional workspace from day one.

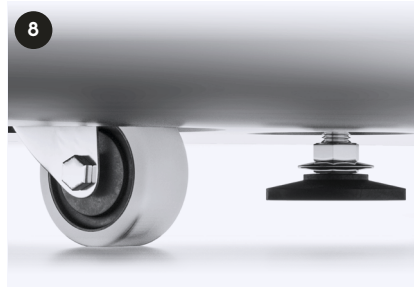

Simple, Reliable Door Operation

A robust handle and latch lock make everyday use straightforward and dependable.

Extensive Design Choice

Seven exterior colours, three texture options and 36 fabric colours offer freedom to create a look that fits naturally into any interior concept.

Easy Repositioning

Integrated casters allow smaller pods to be moved easily as teams, layouts and workplace needs change.

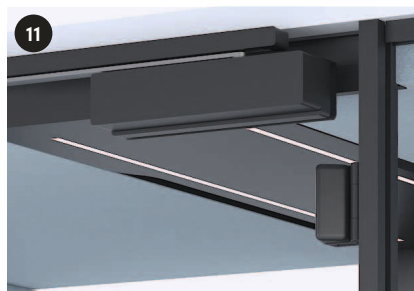

Relocation-Ready Design

Larger pods can be moved by pallet truck without dismantling, helping reduce downtime and disruption.

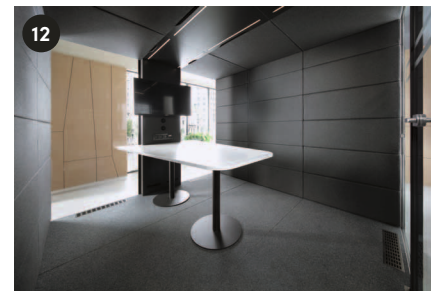

Global Power Compatibility

Configurable plug types support local electrical standards for easier specification across international projects.

Configurable Door Options

Optional door limiters, closers and locks allow each pod to be adapted to specific workplace requirements.

Modular Meeting Spaces

Hushmeet L offers a flexible alternative to traditional meeting rooms, with modular configurations for up to 6 people to suit different team and meeting needs.

Hushphone

Hushphone is built for quick, private conversations, fitting easily into compact offices and can be moved wherever it is needed.

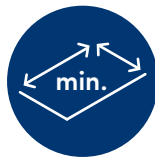

Inside, the pod supports comfortable, focused communication. An ergonomic shelf provides support during calls, while a fold-out table offers space for a laptop when needed. A motion sensor automatically activates the lighting and ventilation,

making Hushphone simple to use from the moment you step inside. With its compact footprint and built-in wheels, it creates a private place to connect wherever the workday takes you.

Private conversations

A dedicated space for confidential calls, video meetings and focused conversations away from office distractions

Minimal footprint

Occupying just 1 m², HushPhone delivers privacy and functionality while making efficient use of office space

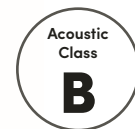

Effortless usability

From automatic lighting and ventilation to integrated power access and work surfaces, every detail is designed to support everyday use.

Standard features

- 1 Motion-activated LED lighting and ventilation system
- 2 Power modules (configurations and availability vary by region)
- 3 Ergonomic rear shelf
- 4 Fold-out table
- 5 Acoustic-lined fabric panels
- 6 Integrated carpeted floor
- 7 Acoustic glass door with a premium handle
- 8 Acoustic rear glass panel (optional frosted finish)
- 9 Anti-collision marking
- 10 Levelling feet
- 11 Integrated castors
- 12 Sprinkler system preparation

Optional equipment

- Hushstool
- Occupancy Indicator
- Door Limiter
- Door Closer
- Privacy Film
- Dry-erase Film

Technical data

For 1 person

External dimensions (W/D/H): 1000 × 900 × 2230 mm

LED ceiling light: 2.5 W, 160 lm, 4000 K; average illuminance 93 lx

Ventilation system: 2 fans; airflow: 144 m³/h (40 l/s); air exchange time: 32 s*

Acoustic performance: Class B according to ISO 23351-1:2020

* Value calculated based on the product volume and the average performance of a single fan.

Hushhybrid

Hushhybrid is designed for longer periods of focused work and video calls, creating a comfortable space for clarity and concentration.

Hushhybrid helps you stay focused, comfortable, and connected throughout the longer sessions. An ergonomic desk provides a comfortable setup, while the option to add a screen or all-in-one computer creates a more complete workstation.

Additional side lighting keeps your face clearly visible on camera, helping video calls feel more natural and professional. Built-in wheels make the pod easy to move around the office, while optional frosted privacy film adds an extra sense of seclusion.

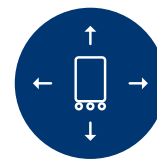

Hybrid work optimized

A purpose-built workspace for video calls and hybrid work

Camera-ready experience

Optimized lighting and integrated screen support for professional video calls

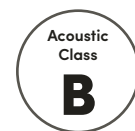

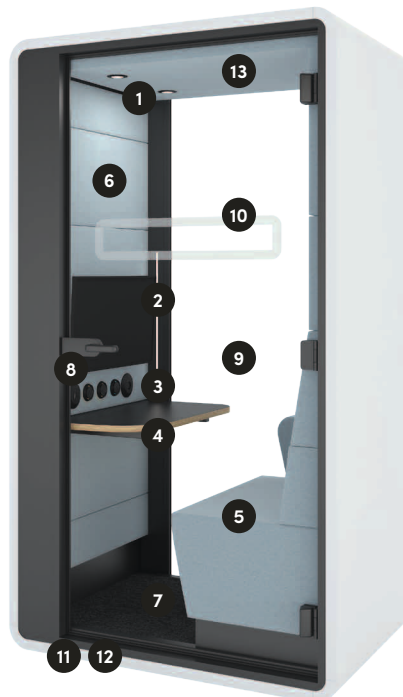

Workplace agility

Designed to move with your workplace, adapting easily to changing layouts and ways of working

Standard features

- 1 Motion-activated LED lighting and ventilation system
- 2 Optional side LED lights for natural face illumination
- 3 Power modules (configurations vary by region)
- 4 Tabletop with depth adjustment

- Privacy Film
- Dry-erase Film

Technical data

For 1 person

External dimensions (W/D/H): 1244 × 900 × 2230 mm

LED ceiling light: 2.5 W, 160 lm, 4000 K; average illuminance 92 lx

Ventilation system: 2 fans; airflow: 176 m³/h (49 l/s); air exchange time: 31 s*

Acoustic performance: Class B according to ISO 23351-1:2020

* Value calculated based on the product volume and the average performance of a single fan.

Hushwork Sit&Stand

Hushwork Sit&Stand supports focused work that moves with you, making it easy to switch between sitting and standing throughout the day.

The manually adjustable desk lets you change position quickly and intuitively, without the need for electricity. Acoustic privacy creates a calm setting for concentration, while the compact design brings

a dedicated workspace into the office. Adjustable lighting and ventilation help create the right conditions for comfort, concentration and wellbeing throughout longer focused work sessions.

Active ergonomics

Seamlessly switch between sitting and standing to support comfort, wellbeing and productivity throughout the workday

Focused performance

A dedicated, acoustically comfortable workspace for concentrated work and uninterrupted productivity

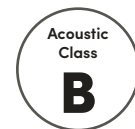

Personalized workspace

Adjustable desk height, lighting and ventilation allow users to tailor the environment to their individual needs

Standard features

- 1 Motion-activated LED lighting and ventilation system
- 2 Power modules (configurations vary by region)
- 3 Desk with manual height adjustment
- 4 Acoustic-lined fabric panels
- 5 Integrated carpeted floor
- 6 Acoustic glass door with a premium handle
- 7 Acoustic rear glass panels (optional frosted finish)
- 8 Anti-collision marking

Technical data

For 1 person

External dimensions (W/D/H): 1600 × 1200 × 2300 mm

LED ceiling light: 18 W, 1890 lm, 4000 K; average illuminance 84 lx

Ventilation system: 3 fans; airflow: 165 m³/h (46 l/s); air exchange time: 68 s*

Acoustic performance: Class B according to ISO 23351-1:2020

* Value calculated based on the product volume and the average performance of a single fan.

Hushmeet S

Hushmeet S is built for spontaneous two-person meetings, bringing privacy and comfort to offices where every square metre matters.

Its compact footprint creates a calm setting for focused conversations without taking up unnecessary space. Designed for quick discussions and collaborative work, the pod makes it easy to

step away from the open office whenever privacy is needed. When needs change, the pod can be moved without being dismantled, giving teams greater flexibility in how they shape their space.

Everyday collaboration

A dedicated space for quick one-to-one meetings, catch-ups and day-to-day teamwork

Speech privacy

Acoustic comfort supports confidential conversations and distraction-free collaboration

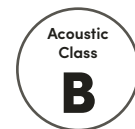

Compact efficiency

Designed for small teams, delivering a comfortable meeting environment within a compact footprint

Standard features

- 1 Motion-activated LED lighting and ventilation system
- 2 Power modules (configurations vary by region)
- 3 Table
- 4 Two integrated single-seat sofas
- 5 Acoustic-lined fabric panels
- 6 Integrated carpeted floor
- 7 Acoustic glass door with a premium handle

- 12 Sprinkler system preparation

Optional equipment

- TV Mount
- Occupancy Indicator
- Door Limiter
- Door Closer
- Door Lock
- Privacy Film
- Dry-erase Film

Technical data

For 2 person

External dimensions (W/D/H): 2150 × 900 × 2300 mm

LED ceiling light: 14 W, 1470 lm, 4000 K; average illuminance 73 lx

Ventilation system: 4 fans; airflow: 180 m³/h (50 l/s); air exchange time: 63 s*

Acoustic performance: Class B according to ISO 23351-1:2020

* Value calculated based on the product volume and the average performance of a single fan.

Hushmeet

Hushmeet is perfect for small teams to meet, create, and collaborate in privacy without taking up more space than two standard desks.

A comfortable acoustic environment gives up to four people the freedom to exchange ideas, hold confidential conversations, and work together without distractions.

Its efficient footprint brings a dedicated meeting space into the office, while the ability to move the pod without disassembly makes it easier to adapt to the workplace as needs change.

Team collaboration

A dedicated space designed for productive team meetings, workshops and collaborative discussions

Meeting comfort

Acoustic comfort, fresh airflow and integrated furnishings create an environment that supports longer, more effective meetings

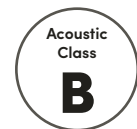

Flexible functionality

External dimensions (W/D/H): 2150 × 1390 × 2300 mm

LED ceiling light: 20 W, 2100 lm, 4000 K; average illuminance 112 lx

Ventilation system: 6 fans; airflow: 270 m³/h (75 l/s); air exchange time: 68 s*

Acoustic performance: Class B according to ISO 23351-1:2020

* Value calculated based on the product volume and the average performance of a single fan.

Hushmeet L2

Hushmeet L2 brings project teams together in a comfortable space for focused discussions, hybrid meetings, and everyday collaboration.

Designed as a dedicated hub for project work, it gives teams the privacy and calm they need to exchange ideas, make decisions, and stay aligned. Integrated power supports hybrid collaboration,

while motion-activated lighting and ventilation make the space ready to use from the moment the team steps inside.

Focused collaboration

A comfortable environment for project discussions, team meetings and everyday collaboration.
